## PRE-PURCHASE question (add / delete rows)

Posted by pambesteder - 2017/02/14 15:15

---

Would a front end user have the ability to ADD or DELETE content in the table in Joomla.

For instance....I want to create something like "MyCustomers" where a user logs in, is directed to their own page...and from there see a table of their list of customers.

I want them to be able to add a customer to the table or delete a customer....or edit the customer's information.

Is this possible with ARI Data Tables?

if not...if there another ARI extension that might be able to do that?

Thanks

Hello,

The extension doesn't support ability to add/edit/delete data.

Regards,  
ARI Soft

Thank you for the quick reply.

Sigh....I'll just have to keep looking.

Thank you
