
convert date ddmmyyyy to dd.mm.yyyy

Posted by platzek_ARISoft - 2017/03/06 23:43

Hi,

is there any way to convert a date ddmmyyyy to dd.mm.yyyy at ARI Data Tables -> Columns settings -> Format?
Something like a STR_TO_DATE function?

Thanks a lot for your help!

Hello,

Enter column name in "Columns settings -> ID" parameter and populate "Columns settings -> Format" parameter with the following value:

```
{ $value | regexreplace: #(\d\d)(\d\d)(\d\d\d\d) #: $1.$2.$3 }
```

Regards,
ARI Soft
