## 500 Error decoding JSON data: Syntax error

Posted by NTM - 2017/04/24 07:34

---

Hello everybody,

I have the following problem. I use Joomla 3.6.5 with ARI Data Tables 1.15.10.

If I create a module and then something to change something I get the following error. 500 Error decoding JSON data: Syntax error.

I have tried to fix errors in which I have the last version again installed. No success

Hello,

Download the latest version of "ARI Data Tables" module in "Member Area" on our site and update it on your site.

Regards,  
ARI Soft
