
How to insert HYPERLINK in csv-file

Posted by varnenka - 2017/04/27 11:19

Hello, I want to insert hyperlinks in one of columns,external hyperlink.

Is it possible to insert hyperlinks in csv format file? I tried to put command =HYPERLINK("http://somalink";"linkdisplay") in csv file, but noting changes, it's not working.

What is the solvation, probably I have syntax errors in command line for links, but it is important for my site.

Here is my site: <http://agup.varna.bg/index.php/registers/2013-04-23-07-00-18/razresheniya-za-stroezh-2017-g>

I want to put link in the latest column.

Please, answer as soon as possible.

Best Regards,

S.Nikolova

Hello,

CSV is a simple format and it doesn't support any formatting command, but "ARI Data Tables" can format retrieved data (from database or CSV files). For this use "Columns settings -> Format" parameter. For example if "Link" column contains links, set "Columns settings -> ID" parameter to Link value and populate "Columns settings -> Format" parameter with the following value:

Link

I made this. but now I'm trying to make new file with some text and link as:

=HYPERLINK("http://www.google.bg";"google"),in Columns settings I set Id= Link, and value >Link, but it's now not working. What was wrong?

Hello,

Could you send your CSV file and screenshot(s) of module settings page by email?

Regards,
ARI Soft
