How to make advanced search in mod aridata tables?

Posted by varnenka - 2017/07/03 11:33

_____

Is it possible to make advanced search - filter by comumn, for each column to make select box and search by column criteria?
See the link below:
https://www.sofia-agk.com/SearchDevelopmentPlans/Index

I want to make more than one search box and search by each column.
Best regards.
S.Nikolova

_____

Hello,

Sorry, but currently the extension doesn't support this ability.

Regards,
ARI Soft

_____

We don't have this kind of the extension. BTW, "ARI Data Tables" supports ability to use request variables in CSV filter parameters. Additional filter inputs can be created outside the module and then use their values in CSV filters.
