
Table header uses more than one line

Posted by DirkD - 2017/07/18 22:23

I love this module, but I am stuck with one small issue ...

On the table header the entry counter and search box are not on one line. See example in the attachment.
How / where can I change the width, so that the contents inside the table header are shown on one line ?

Thanks. http://www.ari-soft.com/images/fbfiles/images/table_header.png

Hello,

Could you provide a link to a page where the problem occurs? It can be a conflict with site template styles.

Regards,
ARI Soft
