
Condensing a hyperlink to a single word

Posted by peppermintpatte - 2017/07/22 16:31

Ouch, I hate to admit it, but my SQL isn't as good as I thought it was!

One of the fields in my table is a very long hyperlink I want to put just a single word which the user can click to be taken to the song that they are looking for.

Can someone PLEASE help me?

Hello,

You can use "Columns Settings" parameters section (in module settings) for this purpose. For example if you want to change format of "Link" column, set "Columns Settings -> ID" parameter to Link value and populate "Columns Settings -> Format" parameter with the following value:
