## email adress without mailto:

Posted by jorgelmx - 2017/07/26 16:13

---

Some data with email address is deployed with hyperlink mailto; How can i make it to not use mailto: option.  
regards

=====

Hello,

mailto: is stored in database (CSV file) and you want to remove it when show these data in "ARI Data Tables"?

Regards,  
ARI Soft
