## Hide some fields

Posted by ananias - 2018/02/07 08:02

---

Hi

I buy and install Ari Data Tables and i want to hade some fields.

For example:

Hide Show Entries top left, hide sort and hide Showing 1 to 10 of ... footer.

I send image to see what i want .

Also i want view 1 row and not 10

This link is my demo site

<http://moriodotisi.gr/news/index.php/business2/2018-01-31-21-22-59/list>

Sorry for my English

Thanks <http://www.ari-soft.com/images/fbfiles/images/ari-cefbaf993ea56d999297abe4a3932029.JPG>

Hello,

Open module settings page and configure the following parameters in "Choose table type -> ARI Data Table" parameters section:

1. Set "Number of rows to display" to 1, "Choose custom paging mode" to "Simple" and populate "Custom pagination" with 1 value to show only one row per page.
2. Set "Paging list" to "No" to hide page size drop-down.
3. Set "Table information" to "No" to hide "Showing 1 ..." message.

Regards,  
ARI Soft

And can i search from one collumn? for example, i have three collumns id, name, surname and i want to search only from id collumn. can be done this?

Thanks

This feature is supported by ARI Smart Content extension. It is possible to specify searchable fields in it.
