
Links in tables

Posted by rastemserie - 2018/03/26 08:25

Hi
how can i insert a link in a table.
Exm:

Title	Year	Point	Vote
Star wars	1978	10	(i want an icon here with a link to the movie)

i can make a table in the data base with movieid,icon,link
Thanks

Hello,

Are links stored in a database or should they be generated dynamically based on title/year/other parameters?

Hi.
I see that links are generated like this:
Movie: La vida futura
Link: <http://www.sfcult.net/index.php/7-la-vida-futura>
Movie: Viaje alucinante
Link: <http://www.sfcult.net/index.php/5-viaje-alucinante>

Where, the number is a field = movie_id, and then the title.

But , i can make a table with this links if its mandatory.
Thanks

By the way my code is :

```
SELECT
A.title AS Titulo,
A.duration AS Title,
YEAR(A.release_date) AS Year,
AVG(R.rating) AS Points
FROM jos_spmoviedb_movies A INNER JOIN jos_spmoviedb_reviews R
ON R.movieid = A.spmoviedb_movie_id
GROUP BY
A.title
ORDER BY
AVG(R.rating) DESC
```

=====

Use the following query:

```
SELECT
  A.title AS Titulo,
  A.duration AS Title,
  YEAR(A.release_date) AS Year,
  AVG(R.rating) AS Points,
  CONCAT(R.movieid, '-', REPLACE(LOWER(A.title), ' ', '-')) AS Link
FROM
  jos_spmoviedb_movies A INNER JOIN jos_spmoviedb_reviews R
  ON R.movieid = A.spmoviedb_movie_id
GROUP BY
  A.title
ORDER BY
  AVG(R.rating) DESC
```

Set "Columns settings -> ID" parameter to Link value and populate "Columns settings -> Format" parameter with the following value:

Link
