Customize table - row height

Posted by Bhaskar123 - 2018/06/19 21:11

_____

I want to increase the cell height. I'm using the "ARI Table Sorter" for many tables, and so need a way to do it for all of them. I couldn't find a way to do it with CSS - when I put changes in the user.css of the Protostar template, it applies to tables on the page but not to the ARI data tables.

What happens now is that the tables draw with good row height, but then the page refreshes immediately, and now the row height is reduced (and alternate rows are shaded grey).

So, how can I customize the presentation of the tables?

Thanks!

_____

Hello,

Could you provide a link to a page with a table which you want to modify?

Regards,
ARI Soft
