
ARI Data Tables with parameters in Select

Posted by castilloamat - 2018/06/27 12:17

Good afternoon

I am interested in buying the Ari Data Tables module but I would like to know first if you can create Select statements with parameters.

Thank you

Hello,

The extension supports ability to use some predefined variables like {\${UserId}}, {\${UserLogin}} and etc. in WHERE clauses of SELECT query. It is also possible to use request and session variables.

Regards,
ARI Soft
