
Exclude result

Posted by niki - 2018/07/24 16:10

Hi,
Is there any way i can exclude result from showing inside the Ari Data Table. For example, we have Practise test inside Ari Quiz and i don't want this result to show up in Ari Data Table. The results are pull from SQL file from our DB

Thank you

Hello,

Could you specify the SQL query which is used in "ARI Data Tables" module?
