
Some table changes

Posted by mkollias - 2019/01/24 12:14

Dear people,

I use Line Chart getting data by an external database (sample 01.png)

You could also see it live at www.grmdb.gr

I searched about how to make changes to the table but didn't manage to find

I tried something like

```
td {  
font-size: 9px;
```

```
text-align: center;  
}
```

but as it seems this affects the rest of the tables in the different places of the template

Could you please help?

thank's <http://www.ari-soft.com/images/fbfiles/images/01-b1e632abe4832f55a0f52139f86517ca.png>

Hello,

Add the following code to "CSS Styles" parameter in module settings:

```
{ $id } td {font-size: 9px}
```

Regards,
ARI Soft
