## ari tiny table template

Posted by medeino - 2019/02/28 21:08

---

hi,

I would like to use ari tiny table template (colors etc.) with the functionality of Ari data table. How could I change css styles?

Thanks for your help

Regards

Hello,

The extension doesn't contain this theme for "ARI Data Table" and sorry, but we don't provide a service for theme creation.

Thanks a lot for your reply.  
And wich css command could I USE to give the same colors of ari tiny table to an ari data table theme?

Thanks

If you have a technical background, you can use a browser dev tool to investigate styles for each table widget and create an appropriate CSS rules.
