## Module does not save and empty query

Posted by paul.bourassa@gmail.com - 2019/03/27 00:57

---

Running Joomla 3.9.4 and latest version of Ari Data Tables (1.16.4), module does not save changes even if system message says it was successful and seems the query is not executed as the page throw a "0" sql empty query error (I had to paste the sql query directly in the .

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate the problem.

I am seeing the same issue, and have determined that it is caused by an interaction with Regular Labs' Advanced Module Manager.

Specifically, the default module manager triggers the following when a module is edited or deleted: onExtensionBeforeSave / onExtensionAfterSave / onExtensionBeforeDelete / onExtensionAfterDelete AMM 7.11.0, on the other hand, triggers these: onContentBeforeSave / onContentAfterSave / onContentBeforeDelete / onContentAfterDelete

Apparently, the problem cannot be fixed in AMM, because of a limitation in the Joomla core (see this bug report).

For the moment, I have solved the problem in ARI by hacking plugins/system/ariextensions/ariextensions.php as follows:

```
--- ariextensions.php.ORIG    2019-02-05 15:10:29.006982402 -0500
```

```
+++ ariextensions.php    2019-05-28 14:29:40.886223593 -0400
```

```
@ @ -36,6 +36,15 @ @
```

```
    var $_cacheEnabled = null;
```

```
    /**
+    * JMD
+    * A total hack; Regular Labs Advanced Module Manager calls onContentBeforeSave instead of
onExtensionBeforeSave.
```

```
+    */
+    function onContentBeforeSave($scope, $data, $isNew)
+    {
+        $this->onExtensionBeforeSave($scope, $data, $isNew);
+    }
```

```
+    /**
+    * Allow to processing of extension data before it is saved.
+    *
+    * @param    object    The data representing the extension.
```

Perhaps this workaround can be added to the official code base.

Hello,

Thank you for sharing your investigation and for the solution. We will check the code and if it doesn't cause any problem, we will include it to the next "ARI Data Tables" release.
