
Ari data tables

Posted by amitrns04 - 2019/07/29 07:20

Sir

I am running a computer institute. I want to use your extension for student validation with following modifications as

1. Firstly, a form should be shown to enter student roll number and date of birth and a submit button.
2. If and only if a visiter enter the correct combination i.e. roll number and date of birth then rest of contents and images should be shown.
3. User login does not required.

Plz tell me the price of modified dxtension

=====

Hello,

Sorry, but currently we don't provide a service for modification of the extensions.

Regards,
ARI Soft
