
German-Language

Posted by knosoft - 2020/05/05 16:40

Good day!

Can someone please tell me whether there is a German language file for Ari datatables or where I can find the corresponding ini file?

Thanks a lot

Best regards

Hello,

The extension contains only English translation. New translation can be added via INI language file (it is standard Joomla! approach). See /language/en-GB/en-GB.mod_aridatatables.ini file for English translation. The similar file should be created in folder with translation for German language.

Regards,

ARI Soft

Good day!

Please can you help me again?

I am looking for the place where the marked passages can be translated.

Excuse my awkwardness, I'm a beginner in css.

Thank you very much!

I try again with the picture.

It's about

- Show n entries

- search
- Showing n to n of n entries

Sorry for the delay. See en-GB.mod_aridatatables.sys.ini file in folder with English translation.

Create the similar file in folder with German translation.

BTW you can use Localise extension to create translations for Joomla! extensions.

Regards,
ARI Soft

Hi!
Thank you very much for your reply, it helped me a lot.
Waiting was not a problem.
If I need a Joomla extension again, I will definitely look for you first!
Sincerely yours
Knobloch Harald
