
ARI DATA table not working

Posted by hardik - 2020/08/27 07:26

Hi there,

I tried to set up the ari datatable for my website. Its not working.

I have a table already <https://www.southafricancasinos.co.za/about-us.html>.

I am trying to add filter for the table.It have been trying to get this done but still not working.

```
{aridatatables moduleId="313"}
```

I did set it up properly and now it goes to error page.

Can you have a look and assist me

Hi there,

Its still not working activated the plugin and also i added the same code you sent and tried with 313 module id as well.

Please can you have a look at it.
