## Datatables display ari quiz items with link

Posted by blues - 2020/09/01 03:06

---

Hi Team,

I'd like to display ari quiz items in datatables with the quiz link together, any guide or topics to help us to use it?

thanks  
blues

Hello,

Choose "SQL" source type in "ARI Data Tables" module settings and populate "SQL query" with the following value:

```
SELECT QuizId, QuizName FROM bqerc_ariquiz ORDER BY QuizName ASC
```

Navigate to "Columns settings" parameters section, populate "Columns Settings -> ID" parameter with QuizId value and set "Hidden" to "Yes".

Also set "Columns settings -> ID" parameter to QuizName and populate "Columns settings -> Format" with the following value:

```
{ $columns:QuizName }
```

Regards,  
ARI Soft
