
Zebra when heading hidden

Posted by tyner - 2020/11/20 22:26

I've noticed that on Ari Data Table, when "Show Header" is set to "No", the Zebra for the table is disable ?

How can I keep Zebra lines on my tables when the heading is hidden.

Thanks for your feedback.

Hello,

Is it possible to see the problem anywhere? If you use not a plain table then it can occur if the selected table widget doesn't support headless mode.

Regards,
ARI Soft
