
Data Tables with PHP 8

Posted by Master of Disaster - 2021/01/18 14:36

Hello,

testing my website with PHP 8.

Got some messages about data tables:

0 - Call to undefined function create_function()

```
JROOT\plugins\content\aridatatables\aridatatables\kernel\Mambot\class.MambotHelper.php:31
2 AriMambotHelper::processTagList()
JROOT\plugins\content\aridatatables\aridatatables\kernel\Mambot\class.MambotBase.php:41
3 AriMambotBase->processContent()
JROOT\plugins\content\aridatatables\aridatatables\kernel\Plugin\class.ModuleLoaderContentPlugin.php:45
```

Can you tell me, at what time ari data tables will be php 8 ready?

Thank you very much!

Hello,

Could you send your order number by email?

Regards,
ARI Soft

Hallo,

wir haben das gleiche Problem mit dem DATA Table und PHP 8

Gruß TOM
