
Blur some fields content

Posted by tyner - 2021/04/01 12:25

Hello all,

I would like to blur some fields content with ARI Data Tables.

Could you please help ?

Many thanks

Hello,

Do you want to blur all values for particular column(s)?

Regards,
ARI Soft

Yes please, I would like to blur all values for particular columns for PUBLIC/GUEST users, and show the values for a group of users (SUBSCRIBERS)

Many thanks for your feedback.

Hello,

Any news on this please ?

Thanks

Hello,

Sorry for the delay. It is possible to do this for all users. The extension doesn't support ability to do it based on user role. Only if create two module copies and show one for subscribers and another for public/guest.

Populate "CSS Styles" parameter in module settings with the following code:

```
TD.cell-blur {filter: blur(5px)}
```

and in "Columns settings" parameter section specify column index/name in "Columns settings -> ID" parameter and populate "Columns settings -> CSS class" with cell-blur value.

Regards,
ARI Soft

Wonderfull ! Exactly what I was looking for, many thanks !!

Just one last question, I've noticed that even if the content is blurred, it is still possible for a user to copy-paste the content blurred. Is it possible to lock that ?

The extension doesn't support this ability. It requires a custom javascript code.
