
No data available

Posted by hebole - 2021/04/05 14:26

I have installed all associated plugins. I have created a CSV. I have created a hard link and it will not take it. I created it with ./ and it doesn't work either. I have done with / and without / but everywhere I get the same result, while the name of the csv file is correct and also reachable. With and without auto detect. Strict Mode or not. Nothing will help. Why does he keep saying No data available? <http://www.ari-soft.com/images/fbfiles/images/settings.jpg>
