
Sort Option Not showing

Posted by brandonla7 - 2010/08/31 19:44

Hello All,

I need to be able to sort by columns and also need the other settings to take effect like show only 10 items per page. Basically, I feel like I've tried everything and nothings working. Please tell me what I'm doing wrong.

Link to my page:

http://toughguppy.com/nanoviricides/index.php?option=com_content&view=article&id=68&Itemid=71

Please help

Hello,

It seems your site template contains incorrect for removing MooTools library which removes all javascript includes so 'ARI Tiny Table' doesn't work. You can read about it in this article. If you provide temporary access to your Joomla! backend by email we can help fix this issue.

Regards,
ARI Soft
