
Error 0

Posted by marciogarrido - 2021/08/08 14:16

Hi everyone.

I have the module ARI Datatable since 2017 (1.15.14) and it has been working like a charm.

Now, after my update in Joomla (3.9.28), all my front end module from Aridata table return "Error 0" <https://prnt.sc/1l3xjsp>.

Could someone explain if my version does not work? And how can I get the compatible version?

Hello,

Install the latest version of the extension (1.16.5). It is available in "Member Area" on our site.

Regards,
ARI Soft
