
ARI Data Table

Posted by kraftgroup - 2010/09/01 09:53

Just a visual point...

in:

`mod_aridatatables\includes\js\widgets\datatable\css\datatable_jui.css`

on line: 53 min-height: 302px;

if you have a short table, it throws a massive amount of white space underneath it...

Have changed the code to min-height: 20px; and it's working fine...
