
ARI Data Tables for Joomla 4

Posted by MarcoX1 - 2021/09/18 08:20

Hi,

when will ARI Data Tables be available for Joomla?

Greetings

=====

Re:ARI Data Tables for Joomla 4

Posted by admin - 2021/09/18 08:38

Hello,

Unfortunately we can't upgrade it for at least the coming months.

Regards,
ARI Soft

Posted by ha5ao - 2021/09/19 06:06

Hello,
I have been using ARI Data Tables on my site for many years. Now I am rebuilding my site on Joomla 4 platform. This extension is essential for some function on my site. Please upgrade it for being Joomla 4 compatible. I need it. Hope you can do the upgrade soon and the users should not wait for months for the compatible version. Thank you in advance.

Cheers,
Pista

Hello,

will there be an upgrade at all? Or do I have to look for another extension to replace ARI Data-Tables? Thank you in advance for your answer.

Regards

Hello,

We will upgrade it, but not in the coming months.

Regards,
ARI Soft

Thank you for your response. That's all right with me, because some other extensions of my website are not yet Joomla-4-ready, too. I think, I won't upgrade before fall 2022. Main thing for me: you upgrade at all.

Regards

I have to encourage you to make the J4 update.

A lot of us here RELY on your GREAT extension. There is nothing that competes or provides even close functionality. Our businesses depend on your product.

It seems that you have committed to a J4 update. It would be helpful if you published a timeline as to when you can expect it to be available, as your customers need to plan and budget, just like you do.

Thank you for your hard work over the years. Speaking for myself I am happy to pay for the update. I'm guessing others here feel that way as well.

Like others, I use this extension a lot and it would be really helpful to have an idea of the timescales. I don't have to move to J4 yet, but I will sometime and I need to know when extensions will be ready. Thanks

Re:ARI Data Tables for Joomla 4

Posted by ha5ao - 2022/02/20 08:32

Half a year went away and no J4 compatible upgrade available, yet. Very disappointing. AriData Table listed #1 Top Products on your web site:

Top Products
ARI Data Tables
ARI Sexy Lightbox
ARI Quiz
ARI Smart Content
ARI Stream Quiz - Personal

Five month was not enough to update your top product? It is ridiculous to say at least.

Hello ARI Soft,

I am also waiting for ARI Data Tables for Joomla 4. Can you please give an estimate when this will happen.

Thank you.

With kind regards,
Peter

Well, I'll just come out and say it.

It's rather hard to have much confidence in ARI-Soft when there does not seem to be a defined plan to upgrade ARI Data Tables to Joomla 4. All we know is that it will take an undefined number of months. Unfortunately, that's not sufficient information for me to plan for. Joomla 4 is marching ahead, but I have no confidence that ARI-Soft will be there when it will be needed.

I love ARI Data Tables and I'd like to continue using this product but without an estimated release date for Joomla 4 support, I am rapidly reaching the point where I must assume that ARI Data Tables will not be updated to Joomla 4 and I will have to transition to some alternative.

The clock is ticking.

I agree. I need to know within the next few weeks, when ARI Data Tables will be updated to Joomla 4. Otherwise I will have to look for an alternative. I can't wait too much longer, because it will take me much time to go from Joomla 3.X to Joomla 4, so I will have to start the process soon.

The clock is indeed ticking.

Guys from ARISoft,

At least do not ignore your customer and give an update about the progress in making your products suitable for J4.

Even if you are not planning it to do, let us know so we can look around for replacement.

The way you treat your customers now is disrespectful.

Peter

Re:ARI Data Tables for Joomla 4

Posted by sclg - 2022/06/29 15:51

Going by questions and (lack of) replies in all these forums, I think it is obvious ariSoft has no interest in Joomla 4 versions of anything.

I shall look for an alternative and post here if I find one. Hopefully others will do the same.

Hello

When will ari data table be ready for Joomla 4? :(

Re:ARI Data Tables for Joomla 4

Posted by swemmel - 2022/09/23 11:26

BUMP,

ARISoft totally dis-respect their customers by not answering any questions.

Re:ARI Data Tables for Joomla 4

Posted by admin - 2022/09/24 12:06

Unfortunately we don't have an ETA for "ARI Data Tables" with J4 support. We will announce it when this is ready.

Regards,
ARI Soft

Re:ARI Data Tables for Joomla 4

Posted by EfBeGe - 2022/09/24 13:08

More than one year ago you wrote "no upgrade in at least the next months."
Later you wrote "We will upgrade it, but not in the coming months."
And that's it. No more word from you since then. For more than one year!

May I be honest? I do not believe you anymore. I do need to know within a fortnight whether there will be an upgrade or not. And I do need to know the exact date, the upgrade will be ready to work. But as I wrote, I gave up hope to get the information - and that you will upgrade at all.

I am already looking for a replacement for "Data Table", because I cannot wait any longer. And providing an upgrade some days before the end of Joomla 3 is no option - that would be much too late.

Meanwhile I regret that I ever bought "Data Tables". It gives me a lot of work now to replace it. Work (and time!) I could have saved if I never had used "Data Table". Sorry I have to write that: I will surely not recommend Ari Soft and its software to anyone who asks. Just the opposite.

I think with not updating (in time or at all) you will lose a quite number of your customers. I guess you lost me already.

Any suggestion dates to offer maybe, when it will be available - or will it at all???

You're losing clients...

Re:ARI Data Tables for Joomla 4

Posted by doublemetre - 2022/10/27 09:26

hello do you have a similar extension to advise us?

Re:ARI Data Tables for Joomla 4

Posted by G79EAy397xx4 - 2022/11/11 00:11

Ari-Soft may not have an ETA for Joomla 4, but Joomla sure does.

But it turns out that I can't even wait that long. My hosting service will be ending standard support for PHP 7.4 in a couple of months (which means that if I stay on PHP 7.4 they charge me extra.) So, time to update to at least PHP 8.0. And guess what? ARI Datatables breaks. :angry:

That was the last straw. I've run out of time. I've coded my own solution and kicked ARI Datatables off my site. Datatables been a good product and served my needs for many years, but in the immortal words of Darth Vader, "You have failed me for the last time."

Buh-Bye.

Re:ARI Data Tables for Joomla 4

Posted by sclg - 2022/11/12 16:33

I gave up waiting and now use both Droptables from <https://www.joomunited.com/products/droptables> and Tabulizer from <https://www.tabulizer.com>

Not quite as simple as Ari Data Tables but they have met my needs. Like you, I couldn't wait till some unspecified date.

=====

Re:ARI Data Tables for Joomla 4

Posted by EfBeGe - 2022/11/24 13:29

Last week I migrated a website from Joomla! 3.x to Joomla! 4.2. Next week I will begin with my website, that uses Ari DataTables. Either there will DataTables ready for Joomla! 4.X and PHP 8.x - or I will use droptables and kick off DataTables once and for all.

I will use droptables, because I do not need an online-wizzard as it is (according to reviews in Joomla Extensions Directory) necessary with tabulizer.

Finding Spam in this forum I guess, AriSoft is not interested neither in its software anymore nor in this forum. Otherwise spam would be deleted, questions answered - and software updated.

Posted by jcmdlv - 2022/11/28 15:44

We need ARI for JOOMLA 4 !! ;))
Data table and smart Content

=====

Re:ARI Data Tables for Joomla 4

Posted by hpinson - 2023/05/04 17:16

Neither Droptables or Tabulizer are anywhere as near as versatile/ flexible as Ari Data Tables. Fabrik's future seems questionable too. ADT was a FANTASTIC Joomla extension.

This company's communication skills are deplorable - a vague maybe if/ when they get to it is a big FU to customers

willing to pay. This is a real loss. :(

=====

Re:ARI Data Tables for Joomla 4

Posted by sclg - 2023/05/04 18:20

I agree. I've managed to cover my needs with Droptables but ADT was better. However, I think we have to accept that ADT for Joomla is just of no financial interest to them any more and move on. It would be more helpful, if they just said 'We aren't going to update it' as then we'd know where we stood. Even if they DID update it, I'm not sure I would use it again as I'm afraid they have lost my trust.
