
ARI Data Tables for Joomla 4

Posted by MarcoX1 - 2021/09/18 08:20

Hi,

when will ARI Data Tables be available for Joomla?

Greetings

Hello,

Unfortunately we can't upgrade it for at least the coming months.

Regards,
ARI Soft

Hello,
I have been using ARI Data Tables on my site for many years. Now I am rebuilding my site on Joomla 4 platform. This extension is essential for some function on my site. Please upgrade it for being Joomla 4 compatible. I need it. Hope you can do the upgrade soon and the users should not wait for months for the compatible version. Thank you in advance.

Cheers,
Pista

Hello,

will there be an upgrade at all? Or do I have to look for another extension to replace ARI Data-Tables? Thank you in advance for your answer.

Regards

Hello,

We will upgrade it, but not in the coming months.

Regards,
ARI Soft

Hi,

Its disappoint me. :(

Thank you for your response. That's all right with me, because some other extensions of my website are not yet Joomla-4-ready, too. I think, I won't upgrade before fall 2022. Main thing for me: you upgrade at all.

Regards

I have to encourage you to make the J4 update.

A lot of us here RELY on your GREAT extension. There is nothing that competes or provides even close functionality. Our businesses depend on your product.

It seems that you have committed to a J4 update. It would be helpful if you published a timeline as to when you can expect it to be available, as your customers need to plan and budget, just like you do.

Thank you for your hard work over the years. Speaking for myself I am happy to pay for the update. I'm guessing others here feel that way as well.
