## Cannot save settings in columns settings for SQL D

Posted by rusesadmins - 2021/12/16 14:49

---

I have created an SQL data set.

When I go to the columns section of the page, no matter what I do the changes are not saved...

1. I try to add additional columns to the column settings
2. I try to adjust the column settings for some columns to allow sort and others not to allow sort
3. I try to adjust one of the columns to be a type of numeric

No matter what I do the changes are not saved.

php 7.0.7  
joomla 3.10.3

Any suggestions?

thanks,  
Laura

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,  
ARI Soft
