
Frontend-User-Access

Posted by kraftgroup - 2010/09/03 08:00

<http://extensions.joomla.org/extensions/access-a-security/frontend-access-control/6874>

Hi,

the extension above is the only thing i have enabled on our site, and suddenly the following error is occurring in all our modules:

Warning: html_entity_decode() expects parameter 1 to be string, array given in
C:\xampp\htdocs\kraftnew\libraries\joomla\html\parameter\element\text.php on line 45

Any ideas?

here is what it looks like now... <http://www.ari-soft.com/images/fbfiles/images/Untitled-a86b6f256f56160fce4e3584b2733e5b.png>
this is after disabling the plugin again...

Hello,

Provide temporary access to your Joomla! backend by email that we can investigate this issue.

Regards,
ARI Soft

Re:Frontend-User-Access

Posted by kraftgroup - 2010/09/09 12:43

where would you like me to send it to?

=====

Re:Frontend-User-Access

Posted by admin - 2010/09/09 14:42

Set CSV delimiter parameter to '|' because it's non-standard delimiter character and the extension can't auto-detect it.

Regards,
ARI Soft

Re:Frontend-User-Access

Posted by kraftgroup - 2010/09/09 15:35

Why would it reset some of the settings and not the others?

It seems the column settings were kept but the csv settings were lost somehow (and no, I didn't change anything) ...

Does the settings saved in the DB not have exclusivity on a table?

=====

Re:Frontend-User-Access

Posted by admin - 2010/09/09 16:07

We don't know. The module works as standard Joomla! module and it uses settings which administrator set on module backend. The module doesn't change CSV files (it only reads from files) and don't change any settings in database. A 3rd party extension can change some settings.

Regards,
ARI Soft

Thanks guys!

Guess it's just something people need to look out for, it's still an awesome extension!
