Ari Tables not paging at initial page load
Posted by celblock - 2010/09/24 16:21
_____

Hello,
I recently purchases Ari Tables, and i am having a problem with one thing. It iinstlaled correctly and is loading the csv file correctly, however it does not page the items when the page is initially loaded. It loads all the contents of the csv file even though i have set it to only load 10 in the module. However, if i select a value after the page loads, then it begins functioning correctly.

here is a link to what i am talking about

Hello,

Could you provide temporary access to your Joomla! backend by email that we can investigate this issue? It seems the module is configured incorrectly because the table doesn't contain tag.

Regards,
ARI Soft

This issue occurred because HTML table doesn't contain
header but it requires for 'Tiny Table' widget that provides sorting
functionality. We corrected the CSV file because it contains empty first
row and set 'HTML table settings -> Show header' and 'CSV -> Heading'
options to 'Yes'.

Regards,
ARI Soft
