# create table by userid

Posted by luisa - 2010/09/26 15:24

_____

hi i need to create a table showing only the current users records from a table
is there a way i can do this...

_____

Hello,

{$UserId} predefined variable can be used in SQL query. It will be replaced with ID of currently logged user. For example
you can use the following SQL query:

SELECT `name`,`username`,`email` FROM #__users WHERE id = {$UserId}

Regards,
ARI Soft

_____

thank you - worked like a charm

i must have had a syntax issue cos that was what i was trying to use

all good now!
