## linking records to form

Posted by luisa - 2010/09/28 11:34

---

okay now i want to link records from the results of on of my datatables to a form i just created to use with lightbox

ie. the datatable produces a list of invoices and if the user wants to edit one, he/she can click on the name of the invoice and it opens up the form in the lightbox

can it be done?

=====

Could you specify how looks link to a form and what SQL query you use? If it's private information you can provide it by email.

Regards,  
ARI Soft
