mod_aridatatables

When I enter and save a link string eg {\$value}
in the Format column of the Columns Settings section of the mod_aridatatable I get some html exposed at the bottom of that section - see attached image http://www.ari-soft.com/images/fbfiles/images/mod_aridatatables_col_settings_.jpg

Hello,

Do you use the latest version (v. 1.3.10) of the module? If not, download and upgrade the module.

Regards,
ARI Soft
