
ARI Date Table Set up Instruction

Posted by primeedge - 2010/11/20 21:26

Hello,

I received file (aridatatables_unzip_first.zip). I tried to install this file under Joomla! 1.0. But, I am getting an error "Error! Could not find an XML setup file in the package.". Could any help me to provide an instruction how to set up ARI Data Table?

Thanks,
Parin

Hello,

aridatatables_unzip_first.zip archive contains installation packages for plugin and module. It requires to unzip aridatatables_unzip_first.zip archive, read readme.txt file and install module and plugin if it is necessary. BTW, "ARI Data Tables" is Joomla! 1.5 extension, it doesn't work under Joomla! 1.0.

Regards,
ARI Soft
