
Problem with creating a link with .csv

Posted by martti - 2010/11/25 20:49

Hi! Im using excel to create .csv files and im using ARI Data Table layout, but it wont show my hyperlink ? is there a possibility to get hyperlinks working without changing the methods that im using right now..

=) Love this extention!!

and one more thing ofcourse =D
im havin a problem with sorting.. everything is fine if i sort like:

1
2
3
4

but when i insert coma, it goes like that

15
17
9
9,3

Hello,

1. If you want to convert plain column values to hyperlinks, "Columns settings -> Columns settings" parameter can be used. Set "ID" to column index (zero-based index is used) or column name and set "Recognize links" to "Yes".
2. The module should display these characters. If your CSV file is saved in non-UTF8 encoding, save it in UTF-8 encoding or specify file encoding in "CSV -> File encoding" parameter.
3. About sorting, what table widget you use?

Regards,
ARI Soft

It is possible to use "." instead of ","? In this case the widget will sort values correctly.

I tried, but still i cant get links to work and there is still is a problem with listing..

I want all entries in the first column to be links..

And listing - you can see how its sorts the numbers right now (dont pay attention to Mbits and Kbits =)) <http://www.ari-soft.com/images/fbfiles/images/tst1.jpg>

Could you provide temporary access to your Joomla! backend by email and link to page where we can see this problem?

Regards,
ARI Soft

Hello,

Thank your for credentials, but could you explain in what column in CSV table links are located? If CSV file doesn't contain link, where the module should get it?

Regards,
ARI Soft

I got the links working.. Thing was that i created .csv files with excel and due to encoding i had to save them over with another program, and yeah, links were lost thanks to that.. stupid me, that i didnt double check it before.. sleepless nights, u know =P really sorry for wasting your time like that..

but problems with sorting remains..

Re:Problem with creating a link with .csv

Posted by martti - 2010/11/29 11:26

we tried to use "." - i mean we changed all "," to "." in .csv and still the sorting was messed up. Do I have to change some settings aswell ?

Re:Problem with creating a link with .csv

Posted by admin - 2010/11/29 12:04

Try now please. We have changed "," to "." in module settings for "PÑ...hitariif, Km-hind" and "ĐiÑ†, Km - hind" columns and now sorting works fine.

Hi

Can you share how did you manage to preserve links in the CSV file.
I have the same problem like you and can't find the way to save the CSV file that will keep the hyperlinks.

Cheers

Hello,

Could you specify codes your CSV file contain HTML hyperlinks (like link) or it contains only link (like http://domain.com) and you want to convert it to hyperlinks? If it is possible, could you provide CSV file which you use by email?
