Reset sort order

Posted by Bhaskar123 - 2010/12/15 22:48
_____

Hello,

Using the TableSorter, when I sort the table, the original order is lost. So for example, let's say I sort by clicking on the sort arrow on column 3. Then the order of the rows changes. Now, then I reload the page, the original order doesn't come back. How can the original order of the rows be retrieved?

Thanks.

Hello,

Could you provide link to page where we can see this problem?

Regards,
ARI Soft
