Module borders (shadows?)?

Posted by ibi_ninja - 2011/01/13 12:21

_____

Hi guys
First off; big thanks for the great module...simply beautiful ...

I was wondering maybe I could get an advice on something;
I had the module installed;
I'm attaching a snapshot of my problem; you will see that the sides have some lines ... any thoughts? (better seen on the attached snapshot...)

thanx in advance http://www.ari-soft.com/images/fbfiles/images/temp.gif

I've edited this post since Problem is Solved; in case anyone in the future wondered on how I did it..
Simply added the drop shadow function that was provided in this forum to my template Css file...
