## Fade Transition in IE

Posted by jenlloyd - 2011/01/18 13:22

---

Hi there

I recently installed the ARI Image Slider after having this issue with every other slideshow plugin I have tried.

Basically the fade transition between images is beautiful in Firefox, Opera and Chrome, but in IE (I have tried both IE6 and IE8) the transition is stuttery and not smooth. I have been searching for days but I cannot find any help on this and I'm tearing my hair out!

Here is the url: <http://enterprise.terrassl.net/~milltest/>

I would really appreciate if someone could look at this for me as I don't want to have to resort to using flash to give the client their slideshow. :(

Thanks!

Jennifer

Hello,

It can be a problem with a 3rd party extension or IE performance issue.

Hi

This is the only 3rd party mod currently on my Joomla installation, and with regards to an IE performance issue do you mean my own versions of IE or IE in general?

---

IE in general.
