## Linkable Image

Posted by oban - 2011/02/17 10:32

---

Hi

I was just wondering how do you get each of the individual images in the sideshow to be linked to another page?

Thanks  
Oban

---

Hello,

Use INI file for this purpose. Link to sample INI file can be found "Description" field on module settings page:

<http://www.ari-soft.com/images/fbfiles/images/slider-6443c0fc6ba5e830940d9d304b614662.png>

Hello,

I followed the procedure but the image is still not clickable.

Here is my .ini file :

-----  
image.png=Description

image.png="http://www.mywebsite.com"  
-----

PHP Version is 5

Could you help me ?

Many thanks,

Steve.

---

Hello,

Could you provide link to page where we can see the issue?

Regards,  
ARI Soft

---

Hello,

It seems you haven't placed INI file into image folder. In your case INI file (by default it has name ariimageslider.ini but it can be overridden in module settings) should be located into /images/accueil/ folder.

Regards,  
ARI Soft

Hello Admin;

I did changes in ariimageslider.ini  
as follows,

banner gp.jpg="Sell / Rent"

banner gp.jpg="http://m4m.com"

banner gp.jpg="Sell / Rent"

but still im not getting link on the img.

Is thr any other chnges i hv to do?

Means i hv to create /images/accueil/ folder/ariimageslider.ini

Am i right?

Plz give me suggestion.....  
Thanx in advance

Regards,  
Veer

---

Hello,

INI file should be place into image folder. This information can be found in "Description" field on module settings page:

<http://www.ari-soft.com/images/fbfiles/images/instructions.jpg>

Similar issue with complications! Site:website Worked perfectly yesterday when I first tried the module. However, now I've attempted to put it into use I get two issues:

First: only the info displays correctly, the link info is ignored (if you look at the page in Firefox (3.6.15) using Firebug (1.6.2) all seems to be correct BUT (as I've commented in the 'description' data) the links do not work!

Second issue: last image does not display - despite the generated thumbnail being correctly produced, when either it is clicked or the image slides to display the last image in the folder in place of the .jpg the code of the .ini file is displayed in white on black and fills the whole display.

I've attached the .ini file and a .png of the display issue.

Any help / suggestions of what I've done wrong very gratefully received!

:(

---

Hello,

You INI file has incorrect format. '10\_Advert\_18.jpg=' doesn't contain closed quote. It should look like '10\_Advert\_18.jpg='"

Everything now working wonderfully! I'm embarrassed, but then life's like that! :blush:

I have several clients who'll definitely benefit from your expertise and I've plans to be buying several of your commercial extensions now that I've seen what you can do!

Excellent support guys!

Hi,

I know this problem has been addressed a lot here but even after reading all that I'm still experiencing problems with linking an external (or any) page to the image. My website is

Here is my DESCRIPTION :

'SLIDER-QLT.png="áÐØÙÔÓÝ, ÛÐæÐÚØ îÐàØáîØá áÔàÕØáØ"'

'SLIDER-FB.png="ăÐáÓÐÚÙÔÑÐ éÕÕÙØ Facebook äÐÛÕÑØáÐxÕØá"'

'SLIDER-PRI.png="çÕÕÙÐÕÕ ÓÐÑÐÚØ äÐáÕÑØ"'

'SLIDER-QLT.png="http://xcomputers.ge/"'

'SLIDER-FB.png="http://facebook.com/xcomputers.ge"'

'SLIDER-PRI.png="http://xcomputers.ge/index.php?option=com\_virtuemart&Itemid=53&lang=ka"'

'SLIDER-QLT.png="áÐØÙÔÓÝ, ÛÐæÐÚØ îÐàØáîØá áÔàÕØáØ"'

'SLIDER-FB.png="ăÐáÓÐÚÙÔÑÐ éÕÕÙØ Facebook äÐÛÕÑØáÐxÕØá"'

'SLIDER-PRI.png="çÕÕÙÐÕÕ ÓÐÑÐÚØ äÐáÕÑØ"'

The images as well as .ini file are placed in the folder : images/slider\_pics

I'd really appreciate if you could help me

Hello,

Image file names are case-sensitive, find corrected INI file in attach please.
