## Issue loading thumbs AND images - RokBox

Posted by PaddyThorne - 2011/03/04 18:07

---

Hi,  
Thanks for producing such an excellent module. I can see that it will be excellent once I have sorted out this issue.

I am trying to load a series of 7 smaller images into the slider which will then link to 7 different larger images in the lightbox.

I have followed the instructions given and have added the image path to the larger images (images/slideshow/) and have then turned on Thumbnails and have added the path to the thumbnails folder like this: thumb/{\$filename}.

Im sure that this should work, but all I seem to be getting the slider is a squashed version of the main image:

Could you take a look and let me know if there is anything I have missed?

Thanks in advance.

Paddy

Hello,

If you want to save aspect ratio for thumbnails, specify only one parameter "width" or "height". Omitted parameter will be calculated automatically with keeping aspect ratio.

Hmmm, Its not that I want to maintain the aspect ration, its that the thumbnails are different from the main images. If you have a look now: <http://www.looseconnection.biz/paddythorne/>

This is what is showing in the place of where the thumbnail should be.

Does that make any sense?

Cheers,  
Paddy

I have created a set of 7 of my own thumbnails at the right size. i would like the thumbnails I have created to show instead of the main images, which are shoing at the moment.

Hi, yes of course.

Find the screenshot here: [http://www.looseconnection.biz/paddythorne/images/example\\_backend-screenshot.gif](http://www.looseconnection.biz/paddythorne/images/example_backend-screenshot.gif)

Hope thsi helps.  
Paddy

{fileName} predefined variable which can be used in "Thumbnails path" parameter is case-sensitive. Use the following value in "Thumbnails path" parameter "thumb/{fileName}" instead of "thumb/{filename}".

Hi, thanks for getting back to me.

Horrah, this was exactly the solution I was looking for. It now works!

Thanks for your excellent help and support with this issue.  
I will recommend you guys to my friends.  
All the best,  
Paddy
