
Images not visible in Joomla 1.6

Posted by PGLion - 2011/03/07 19:31

Today I have installed a fresh Joomla 1.6 and the Guest House template (joomspirit.com). The ARI Image Slider is a part of this template but I can not get it to work. The module is installed just fine but the images won't show up. I use this path in the settings: /images/stories/slide/

The images are stored here: <http://xx.xxx.xxx.xxx/~test01/images/stories/slide/10.jpg>. When I type this address in my browser I will see the image, but not when using the image slider.

How can I solve this annoying problem, any clues?

Cheers, PGLion

Hello,

Try to use the next path to image folder "images/stories/slide" instead of "/images/stories/slide/". If it doesn't help, provide link to page where we can see this issue that we can investigate the problem.

Regards,
ARI Soft

Thanks for your fast reply. I have changed the path several ways, but all without succes. I will send you more info in pm.

Edit: Cannot find a pm option. I will send you details in e-mail.

Try now please. You have set "Menu Assignment -> Module Assignment" parameter to "No pages". We changed it to "On all pages".

Regards,
ARI Soft
