
Slider in article

Posted by twhitmore - 2011/04/18 12:07

Hello,

I have published the slider within an article using the supplied plugin but it appears atatic within the article and does not slide. Any suggestions?

Thank you

Hello,

Provide link to page where we can see the problem.

Regards,
ARI Soft

Thanks for the quick reply.

Please see <http://www.vacuum-resource.org/>

I placed the module in a banner position and it works fine but in the article immediately below it is static.

Is it possible to configure so that only the article displays the slider?

The problem occurs because you use the same module instance in the article and in top module position. Create new module instance for module which is loaded into the article.

Perfect!

Thank you so much.
