_____

Hello,
Thank you for your hard work... to get everything ready for JOOMLA 1.6
I looked first to other post before to write nothing is working
the adress of my working website is : isaweb.fr   position of the ari image slider is on position "image from joomspirit template. I am on joomla V 1.6.3
It is a NGO website!!!
But in the folder I have 11 images and   I see only one image   named the others named 02.jpg, 03.jpg, ...
I reinstalled few time the mod... nothing changed I went to downloaded again to reinstall ... nothing changed
Can you help ? Please

Hello,

It is not "ARI Image Slider" problem. If you open javascript error console in a browser, you can see that it contains the error which is caused by mediabox extension. Fix it.

Regards,
ARI Soft
