
Problem with thumbnails

Posted by grzes - 2011/05/18 12:21

Hi there

I have some problem with thumbnails.

I want to set the thumbnail as other picture than it show after click on the image.

I set Image path where I have big image and thumbnails path where I have thumbnails. But modul show my big images with dimensions thumbnails.

I hope you understand my problem because my is a poor ;)

Hello,

Send screenshot of module settings page by email please and specify thumbnails have the same name as big image or not?

Regards,
ARI Soft

Yes they have the same names.

I send you email with title:"Problem with thumbnails"

It is strange. We can investigate the problem in more details if you upload you site to an online server and provide temporary access to your Joomla! backend or create backup of your site with help Akeeba Backup extension and send it to us by email.

Regards,

ARI Soft
