
ARI Image SlideShow covers the dropdown menu

Posted by murphle1965 - 2011/05/18 13:26

Hi, I've seen answers to this question and attempted the fixes suggested, but in Joomla 1.6 on Yootheme 'Symphony' template, I don't have a template.css to apply fix to. The Slideshow completely covers my dropdown menu once the first slide fades to the second slide.

Site is <http://www.jonaswalters.com>. Please help - I really want to keep this extension because it's so incredibly easy to use. It just works... well, except for this little bit but otherwise it's incredible:)
Thank you!

Hello,

This problem with site template styles. Add the next CSS rule to site template CSS file that fix it:

```
#page-header
{
  position: relative;
  z-index: 100;
}
```

Regards,
ARI Soft
