Images are not visible

Posted by kukulcan - 2011/05/26 23:59

_____

hi, i download recently the ari image slider module for my site: www.azttec.com, but it doesn't work fine, the images are not visible, any of them, but when i use the google chrome inspection element tool i can see that the images are uploaded in the html, i create a folder imeges/slides to avoid conflicts with the path, i put images/slides in the image path section.

i apreciate the help can you give me.

Hello,

This problem with "JS Compression" ability in site template. It seems it works incorrectly. If you disable it ("Extensions -> Template Manager -> jv-framework - Default -> GLOBAL SETTINGS -> Performance Settings -> JS Compression" option), everything will work fine.

Regards,
ARI Soft
