global window

_____

hi
how i can change the dimension "high" of this modul ??
All my photos are in the wright height (200 px)
The modul give a lot of space more .. I think - amount 500 px ...
How I can change this ??
Thanks for any answer..

You can see it in :

Re:global window

_____

Hello,

Your images have height equal to 150px. Open module settings page and set "Height" parameter to 150

Re:global window

_____

thank you for your quickly answer.
Now the images are very fine .. but only the littles points are not in the right position ..
where I can configure that ??
Or it's normaly ??
Can I hite it's ??
Also the same adresse:

Re:global window

_____

Navigation buttons in normal position. They are shown in several rows because width of slider is small and have a lot of images. If you want to remove them, set "Show slides navigation" parameter to "No".
