
Blocked dropdown menu

Posted by gombperek - 2011/06/01 23:20

Hi! Excuse me for my english.
In our page Ari Image Slider blocks dropdown menu (with Chrome):
<http://www.pensiontrofana.com>
Can you help me?
Thanx!

Hello,

Add the next CSS rule:

```
.main .navigation
{
    position: relative;
}
```

Regards,
ARI Soft

Working! Super!
Thank you!

Hi,

I recently installed this extension on my website and seem to be experiencing the same problem.

I added the CSS rule in the CSS Styles box in the editing screen of the module and it still does not work properly. The menu appears/disappears ramdonly. Is that correct?

Thanks for the time.

Hello,

This is not "ARI Image Slider" problem, this is a problem with site template styles. Provide link to page where we can see the problem that we can investigate it.

Regards,

ARI Soft

Hi,

I am working on my computer on a local server so I don't think there's a way I can send you the link just yet.

But looking through the forum I found some similar threads and used the CSS given as solutions. The problem persisted anyway.

What happens now is, the menu will go behind the image in the slideshow for as long as it takes the image to transition to the next. If the transitions are fast, then I can barely see the menu.

The CSS rules I used are:

```
.main .navigation { position:relative;}
div.art-header { position:relative; z-index:1;}
#s5_header_wrap { position:relative; z-index:999;}
```

Hopefully this description makes sense and brings light to the problem.

Thanks for all the help and support.

If you can provide link to page where we can see the problem, send page files of the page with the slider by email. This process is described here.

Regards,
ARI Soft
